

UGOCHUKWU FAVOUR

Frontend Engineer | AI Evaluator | Research & Data Professional

Nigeria | Open to Remote & International Opportunities

[Portfolio](#) | [GitHub – Phavourtech](#) |

PROFESSIONAL SUMMARY

Frontend Engineer and AI evaluation professional with hands-on experience building responsive, API-driven web applications using React, TypeScript, JavaScript and Vue.js. Experienced in translating product designs into functional interfaces, integrating REST APIs, implementing routing, search, filtering and pagination, and improving application accessibility and error handling. Alongside software development, experienced in AI response evaluation, data annotation, document review and quality assurance, with an academic background in Criminology and Security Studies that provides additional strength in research, evidence assessment, analytical writing and structured investigation.

Currently developing expertise at the intersection of software engineering, artificial intelligence, data and research, with particular interest in building reliable digital products and applying technology to real-world problems.

TECHNICAL SKILLS

Frontend: React, Vue.js, TypeScript, JavaScript, HTML5, CSS3, responsive web development

Libraries & Tools: TanStack Query, React Router, Vue Router, Vite, Tailwind CSS

Development: REST API integration, component-based architecture, client-side routing, state management, pagination, search & filtering, error handling

Testing & Quality: Vitest, accessibility implementation, debugging, responsive testing

Developer Tools: Git, GitHub, VS Code, Vercel, Netlify, Render, npm

AI & Data: AI response evaluation, data annotation, prompt evaluation, quality assurance, document review

Research: Research design, data collection, literature review, report writing, qualitative and quantitative research

SELECTED PROJECTS

Huddle Workspace — Frontend Engineer

Collaborative Workspace Web Application

- Contributed to the frontend development of a collaborative workspace platform from product designs supplied by the design team.
- Translated interface specifications into reusable web components and worked within a collaborative Git-based development workflow.
- Contributed to responsive interface implementation, component development and integration of multiple workspace views while coordinating code changes with other frontend team members.

Todo Management Application — Frontend Engineer

React | React Router | TanStack Query | REST API

- Developed an API-powered task management application with client-side routing and dynamic task-detail pages.
- Implemented case-insensitive search, task-status filtering and 10-item pagination, designed to work together consistently.
- Built loading and API-error states, custom 404 handling and an application-level Error Boundary.
- Improved accessibility through semantic navigation, keyboard focus states, labels, aria-live notifications and aria-busy states.
- Designed navigation that preserves users' filters when returning from individual task pages.

Posts Application — Vue.js & TypeScript

Vue | TypeScript | Vue Router | TanStack Vue Query | Vite

- Re-engineered an existing React/TypeScript application in Vue.js and TypeScript, demonstrating the ability to transfer frontend architecture and application logic between frameworks.
- Implemented multiple application routes, including landing, posts, individual post and not-found views, with asynchronous data management and routing.

Recipe Web Application — Frontend Development

AltSchool Africa — School of Engineering

- Built an earlier frontend assessment project applying foundational web-development concepts and responsive interface implementation.

PROFESSIONAL EXPERIENCE

Planning, Research & Statistics — National Youth Service Corps

2026 – Present

Ministry of Justice, Enugu State

- Support research, data gathering, documentation and administrative activities within the Planning, Research and Statistics department.
- Assist with preparing reports, maintaining structured records and organising information required for departmental planning and decision-making.
- Work with official documentation requiring accuracy, confidentiality and careful information handling while collaborating with departmental personnel on research and administrative assignments.

AI Evaluator / Data Annotation Specialist

2023 – Present

Freelance / Remote

- Evaluate AI-generated responses against defined quality criteria, including accuracy, relevance, instruction adherence, consistency and reasoning quality.
- Review and annotate structured and unstructured data used in AI-training workflows, identify errors and inconsistencies, and provide evidence-based assessments to improve model output quality.
- Work independently with detailed project guidelines while maintaining consistency across high-volume evaluation and review tasks.

EDUCATION

B.Sc. Criminology and Security Studies

2024

Chukwuemeka Odumegwu Ojukwu University, Nigeria | CGPA: 3.95/5.00

- Undergraduate Research: Influence of Family Structure on Juvenile Delinquency among Residents of Idemili North LGA, Anambra State
- Developed experience in research methodology, data collection, academic writing, literature review and analysis of crime and human behaviour.

Frontend Engineering

AltSchool Africa — School of Engineering

- Practical software-engineering training focused on modern frontend development, including React, TypeScript, Vue.js, APIs, routing, testing, version control and deployment.

ADDITIONAL EXPERIENCE

Academic and practical criminology training included exposure to criminal investigation, correctional administration, aviation security and court processes through placements with criminal-justice and security institutions. These experiences developed

skills in investigation, observation, evidence assessment, documentation, confidentiality, interviewing and analytical reporting that now complement technical and AI-related work.
